

DJ Neill

Full-Stack Software Engineer

djneill.com

CAREER SUMMARY

Experience Full-stack web developer with DJ's Consulting
Languages JavaScript, TypeScript, Python, React, Node.js, Next.js, MongoDB, Tailwind CSS, Express, Astro, HTML, CSS
Tools VS Code, GitHub, Git, PostMan, Photoshop, Vercel, Netlify
Summary An experienced full-stack software engineer passionate about creating innovative web applications.

PROFESSIONAL EXPERIENCE

DJ's Consulting (Freelancing) Remote
Full-Stack Web Developer 08/2022 - Current
Technologies: JavaScript, TypeScript, React, Next.js, Node.js, Astro, Tailwind CSS, MongoDB

- Increased customer engagement by 10% by developing dynamic web applications and static websites focusing on user interaction and engagement features.
- Generated a 15% surge in website traffic by advising clients on SEO and social media strategies, implementing targeted campaigns, and optimizing website content.
- Led to an average sales growth of 20% for clients through designing and implementing custom e-commerce platforms, focusing on user experience and conversion optimization.
- Demonstrated strong project management skills by effectively managing project timelines, milestones, and deliverables, ensuring on-time and on-budget project completion.

Volunteer

Code For American - Austin Brigade
Technologies: TypeScript, Next.js, React, Vercel

- Collaborated with a diverse team of developers and designers in an open-source environment to enhance and maintain the open-austin.org website.
- Contributed to the project using technologies such as TypeScript, Next.js, and React, showcasing proficiency in modern web development tools.
- Actively participated in regular team meetings to discuss project progress, share insights, and address challenges, demonstrating effective communication and teamwork skills.
- Spearheaded the refinement of a key user interaction element, ensuring a more intuitive and user-friendly browsing experience for visitors to the open-austin.org website.
- <https://www.open-austin.org/>

PROJECTS

Client-Capture (Solo Project currently in development)
Technologies: TypeScript, Next.js, React, Tailwind CSS, Shadcn/ui, Clerk, Prisma, PostgreSQL

- A comprehensive platform tailored for small to mid-size businesses to create and manage customer databases efficiently.
- Engineered a custom form feature allowing businesses to capture specific information and notes pertinent to their operations, enhancing flexibility and adaptability.
- Implemented advanced search and sorting capabilities to streamline customer database management, facilitating quick access to relevant customer information.
- Enabled direct form distribution to customers, simplifying the data collection process and ensuring the accuracy and completeness of the customer database.

Let's Cook MVP (Solo Project)
Technologies: JavaScript, Node.js, EJS, MVC Paradigm, MongoDB, Tailwind CSS, Passport.js, Express, Mongoose

- Developed a full-stack web application called "Let's Cook MVP" using JavaScript, Node.js, and the EJS templating engine, following the MVC paradigm for a structured and scalable codebase.

github.com/djneill ▪ linkedin.com/in/dj-neill/ ▪ twitter.com/CodingGuitarist

- Implemented user authentication and authorization features using Passport.js, enhancing the application's security.
- Designed and integrated a MongoDB database to store user data, recipes, and user collections, ensuring efficient data management.
- Implemented key functionalities allowing users to post, search, and save favorite recipes, enhancing user engagement and interaction.
- Established a robust backend with Express.js and Mongoose, ensuring smooth data retrieval and manipulation.
